Swiss craftsmanship – build to last!

SWISS MADE is much more than just producing products in Switzerland. It means functionality, design, durability and innovation. Solis opposes 'the throwaway society' and our products are made to last! From our beginnings our products have been made out of state of the art materials. As one thing has remained the same: the dedication to produce top quality for professionals.

Manufactured with precision and 100% quality control

In Mendrisio, Switzerland, each hair dryer is produced to the highest standards, starting from the housing by using precision injection moulding machines to the final assembly by hand. Each hair dryer has to pass a rigid quality control prior to being shipped to hair stylists and hotels around the world.

Solis of Switzerland

Founded in 1908 by Dr. W. Schaufelberger who invented the famous Solis heating pad, a ground breaking range of professional hair dryers followed in 1933. The entrepreneur Willi A. Nauer took over Solis in 1983 and now his son Thomas Nauer manages the business with 3 strategic business divisions: Hospitality, Professional and Retail. Production is located in Mendrisio, Switzerland, and Solis appliances are available in more than 40 countries around the globe.

From professional to hospitality use

Since 1933 Solis has been producing Swiss Made hairdryers for the world's best hair stylists and now for the first time Solis has developed a range of hair dryers based on professional standards.

**SOLIS Manicure set
230v in violet
type 71**
